

Program of Studies:	Master Program Bioinformatics
Name of the module:	Advanced Practical Training of Life Sciences
Abbreviation:	PB-M-1
Subtitle:	-
Modules:	Practical Training
Semester:	e.g. during the semester holidays
Responsible lecturer:	Students' Dean
Lecturer:	Experimental group leaders of the Center for Bioinformatics or other experimental research groups
Language:	German
Level of the unit/ Mandatory or not :	elective
Course type/weekly hours:	4 weeks full-time
Total workload:	240 h = 160 h of classes and 80 h private study and preparation of the report
Credits:	8
Entrance requirements:	none
Aims/Competences to be developed:	As a preparation to the professional life, the students should get knowledge of the workflow and the working atmosphere in within an experimental research group.
Content:	The research practical training has an experimental character. The topic depends on current research projects of the respective research group.
Assessment/Exams:	Certification of the lecturer that the student has finished the practical training successfully and has written a report. About the practical training. No grades.
Literature:	Depending on the topic.
